ABHAY PANDEY

Software Testing Engineer | QA Automation Engineer | Selenium WebDriver

+91 7252082382 • abhayp1334@gmail.com • linkedin.com/in/abhayhck • github.com/abhayhck

PROFESSIONAL SUMMARY

Software Testing Engineer with nearly one year of experience in QA and database roles, including building an automated testing suite for Nike (a Cognizant client) using Selenium WebDriver with Python. Skilled in test automation, test case design, defect tracking, code reviews and SQL data validation, working in Agile (Scrum) teams. Strong in STLC, SDLC, analytical and problem-solving skills, and team collaboration. Available to join immediately.

TECHNICAL SKILLS

Testing: Manual Testing, Automation Testing, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, API Testing, Database Testing, Test Case Design, Test Plans, Test Scenarios, Defect Tracking, Bug Life Cycle, STLC

Automation: Selenium WebDriver, Python, JavaScript, SQL, PL/SQL, C++, Kotlin, Test Automation Framework, Automated Test Scripts

Tools: Git, GitHub, Linux, Bash Scripting

Databases / APIs: Oracle, PostgreSQL, Firebase, SQLAlchemy, FastAPI, REST APIs, JSON, JWT Authentication

Practices: Agile, Scrum, SDLC, Code Reviews, Root Cause Analysis, Debugging, Cross-Functional Collaboration

Core CS: Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks

WORK EXPERIENCE

Career Break
May 2025 – Present

- Medical recovery; now fully recovered and ready to work.
- Built a full-stack Hostel Management System with an AI SQL assistant (FastAPI, PostgreSQL, Gemini).

Programmer Analyst Trainee
Sep 2024 – Apr 2025

Cognizant

- Wrote and optimized SQL and PL/SQL queries, stored procedures and triggers in Oracle; validated data accuracy and debugged defects (database testing, data validation).
- Worked with cross-functional teams in an Agile (Scrum) environment following SDLC; applied O9 Supply Chain concepts including demand planning, supply planning and inventory management.

Client Project: Nike – Automated Testing Suite | **Feb 2025 – Mar 2025**

- Designed, developed and executed automated test scripts using Selenium WebDriver with Python to build an automated testing suite for Nike, a Cognizant client.
- Wrote test cases from application requirements and functionality, working with development teams.
- Identified, logged and tracked defects found during testing.
- Participated in code reviews and gave feedback on testability and quality.

CSD Intern
Jul 2024 – Sep 2024

Cognizant

- Wrote advanced SQL queries and PL/SQL programs for data extraction, reporting, data validation and query optimization in Oracle.

Cyber Security Intern
Jun 2023 – Jul 2023

AICTE IBM SkillsBuild in Cyber Security

- Completed a 6-week program covering networking essentials, threat analysis and vulnerability assessment through hands-on security exercises.

PROJECTS

Hostel Management System
Python, FastAPI, PostgreSQL, SQLAlchemy, JWT, Gemini API, sqlglot

- Designed a normalized PostgreSQL database (7+ tables), FastAPI REST APIs and JWT role-based access control (Admin/Student) with per-student data filtering.
- Built an admin-only "Ask AI" assistant with the Gemini API (google-genai) that generates SQL, guarded by a sqlglot validator, read-only PostgreSQL role, 200-row cap, rate limiting and audit log.
- Tested the assistant with real questions and adversarial prompts (password hash requests, "delete all fees") and verified the guards refused or rejected them.

CallRecall Android App
Kotlin, MVVM, Room, Coroutines

- Built a caller-linked notes Android app in Kotlin, MVVM and Room with a call overlay, search and optional encrypted backup.

CERTIFICATIONS

Cisco Cybersecurity Essentials • Bash Scripting (Udemy) • Oracle SQL / PLSQL (Cognizant) • Supply Chain Management

ACHIEVEMENTS

Microsoft Engage 2022 Interview Round • 100+ LeetCode problems solved • 5-star Python and C (HackerRank)

EDUCATION

ABES Engineering College | B.Tech, Computer Science | 2020 – 2024 | CGPA: 6.8

Army Public School | CBSE Class XII: 71.6% | Class X: CGPA 7.8
