PROFESSIONAL SUMMARY

Backend Software Engineer with nearly one year of experience at Cognizant in SQL, PL/SQL and Oracle database development, working in Agile teams. Skilled in building REST APIs with Python, FastAPI, PostgreSQL and SQLAlchemy, with JWT authentication and role-based access control. Strong in Data Structures and Algorithms, DBMS, Operating Systems and Computer Networks, with solid communication, problem-solving, collaboration and ownership. Available to join immediately.

TECHNICAL SKILLS

Languages: Python, SQL, PL/SQL, C++, Kotlin, JavaScript
Backend / APIs: FastAPI, REST APIs, JSON, SQLAlchemy (ORM), JWT Authentication, Role-Based Access Control (RBAC), Postman
Databases: PostgreSQL, Oracle Database, Firebase Realtime Database, Query Optimization, Database Design
Tools / DevOps: Git, GitHub, Docker, Linux, Bash Scripting
Practices: Agile, Scrum, Software Development Life Cycle (SDLC), Debugging, Code Collaboration
Core CS: Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks
Web: HTML, CSS, JavaScript

WORK EXPERIENCE

Career Break
May 2025 – Present

- Medical recovery; now fully recovered and ready to work.
- Built a full-stack Hostel Management System with an AI SQL assistant (FastAPI, PostgreSQL, Gemini).

Programmer Analyst Trainee
Sep 2024 – Apr 2025

Cognizant

- Developed SQL and PL/SQL queries, stored procedures, functions, triggers, cursors and database objects in Oracle for enterprise training projects.
- Debugged and optimized SQL queries using joins, subqueries and indexing for better performance and data accuracy, collaborating with cross-functional teams in an Agile (Scrum) environment.
- Applied O9 Supply Chain concepts including demand planning, supply planning and inventory management; followed SDLC practices and version control with Git.

CSD Intern
Jul 2024 – Sep 2024

Cognizant

- Wrote advanced SQL queries and PL/SQL programs for data extraction, reporting and database operations in Oracle.
- Supported Oracle database management, query optimization and performance tuning as part of an Agile team.

Cyber Security Intern
Jun 2023 – Jul 2023

AICTE IBM SkillsBuild in Cyber Security

- Completed a 6-week program on emerging technologies covering cloud configuration, networking essentials and security layers.
- Practiced threat landscape mapping and vulnerability assessment through hands-on cybersecurity exercises.

PROJECTS

Hostel Management System
Python, FastAPI, PostgreSQL, SQLAlchemy, JWT, Gemini API, sqlglot

- Designed a normalized PostgreSQL database (7+ tables) and FastAPI REST APIs for room allocation, complaints, fees and student records.
- Implemented JWT authentication and role-based access control (Admin/Student) with admin-only endpoints, per-student data filtering and XSS output escaping.
- Built an admin-only "Ask AI" assistant using the Gemini API (google-genai) that generates SQL from questions, with prompts built from SQLAlchemy metadata (table whitelist, blocked sensitive column, domain rules).
- Secured it with a sqlglot validator (single SELECT, table allowlist), a read-only PostgreSQL role (column-level grants, 5s timeout), 200-row cap, rate limiting and audit log; results never go back to the LLM.
- Integrated the backend with an HTML, CSS and JavaScript frontend, including an "Ask AI" admin tab; used Git and GitHub.

CallRecall Android App
Kotlin, MVVM, Room, Coroutines

- Built a caller-linked notes Android app in Kotlin, MVVM and Room with a call overlay, search and optional encrypted backup.

CERTIFICATIONS

Cisco Cybersecurity Essentials • Bash Scripting (Udemy) • Oracle SQL / PLSQL (Cognizant) • Supply Chain Management

ACHIEVEMENTS

Microsoft Engage 2022 Interview Round • 100+ LeetCode problems solved • 5-star Python and C (HackerRank)

EDUCATION

ABES Engineering College | B.Tech, Computer Science | 2020 – 2024 | CGPA: 6.8
Army Public School | CBSE Class XII: 71.6% | Class X: CGPA 7.8
